With little investment to healthy air in offices

Autumn is here and opening the windows is not as pleasant anymore, if in schools or offices. Here, decentral ventilation units with heat recovery can help. They provide for fresh and healthy air, without chilly temperatures. So far, our portfolio comprised decentral ventilation units with an air flow rate from 50 m³/h to 1240 m³/h. With the new Freshbox 200 ERV WiFi, we complete our range with a ventilation unit of medium air capacity, equipped with an enthalpy heat exchanger for an even more pleasant room climate. With easy mounting and few settings to energy-efficient ventilation and healthy air.

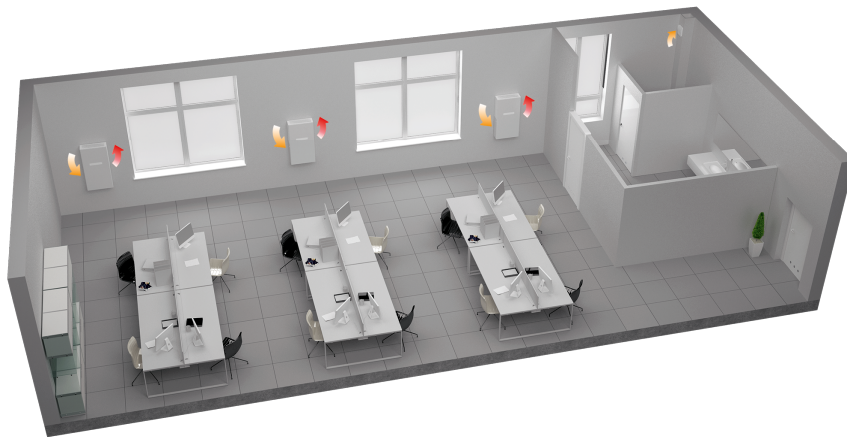

This decentral unit ensures optimum ventilation in rooms with different characteristics and partition.

All pros at one glance:

- 2 core holes only for supply and extract air
- No duct laying necessary
- Possible connection of an extra air duct for exhaustion of an additional small room
- Heat recovery up to 85 %
- WiFi type controllable via app
- Easy maintenance

To the technical data

APPLICATION EXAMPLE

Freshbox 200 ERV WiFi in offices

With the comprehensive and practical settings of the operation parameters for different utilization phases, the ventilation intensity can be adapted to individual needs.

The characteristics and use of the room have to be taken into account precisely in the planning stage. For example, the units may not be placed directly near a work station. Thus, we definitely recommend to consult a planner for technical building services to achieve the ideal result.

OUR DECENTRAL POWER

Air flow rate from 50 m³/h to 1240 m³/h

We have the suitable unit for every room size, room use and number of people.

Ventilation unit up to
50 m³/h air flow rate

Technical data

Freshbox 100 & 200 WiFi

Ventilation unit up to
200 m³/h air flow rate

Technical data

Civic EC DB / LB

Ventilation unit up to
1240 m³/h air flow rate

Technical data

INDOOR AIR FAIR

From 5 to 7 October 2021 the trade fair for ventilation and air quality took place in Frankfurt. We were there and presented the new Freshbox 200 ERV WiFi.
